

Steps to Upgrade CornerStorePOS

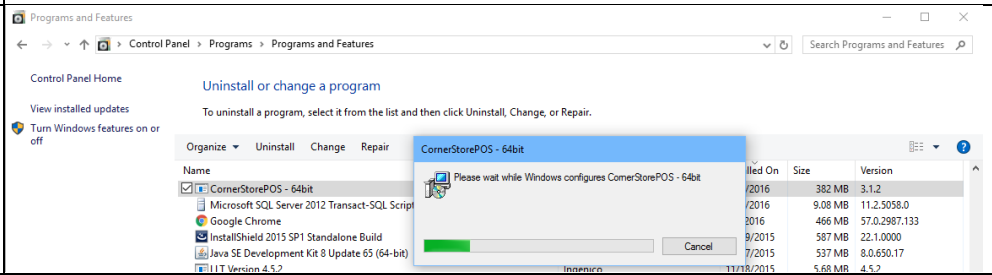

1. Goto Control Panel -> Programs -> Program and Features -> find CornerStorePOS
 (For 32bit computer you should see CornerStorePOS and for 64bit computer you should see CornerStorePOS – 64bit)

2. Highlight CornerStorePOS and click Uninstall

3. You should now see uninstallation process as shown

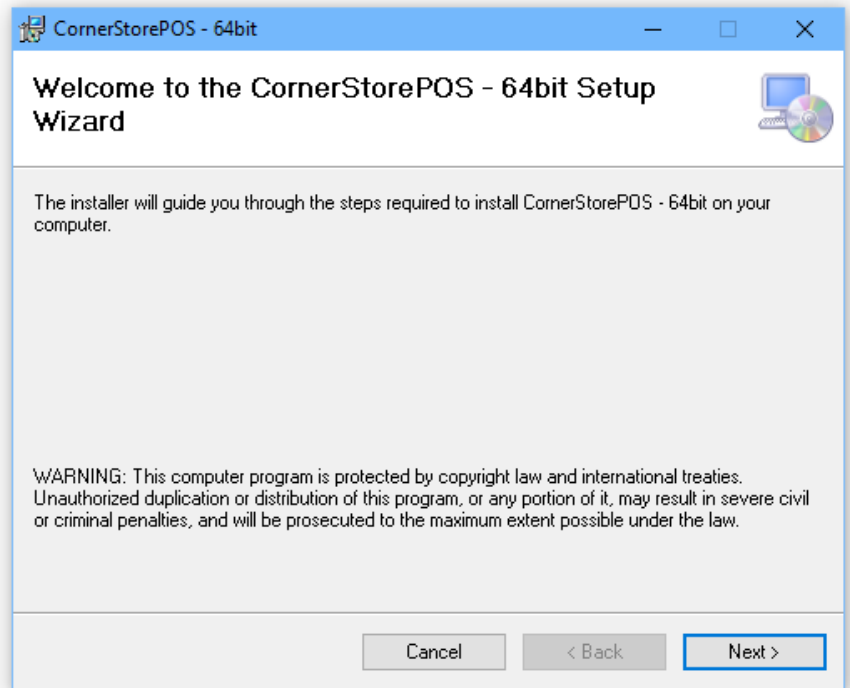

If CornerStore has successfully uninstalled it shouldn't be there in the Program and Features list.

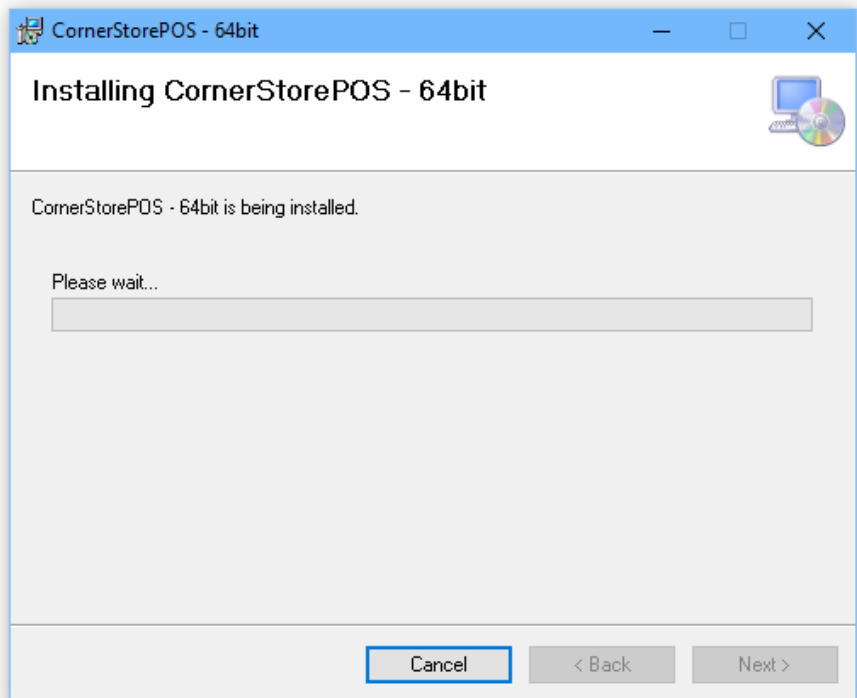

4. Now let's download latest version of CornerStorePOS
 For 32bit Computer: <http://cornerstorepos.com/downloads/software/CornerStore.msi>
 For 64bit Computer: http://cornerstorepos.com/downloads/software/CornerStore_x64.msi

5. Now run the downloaded CornerStore file

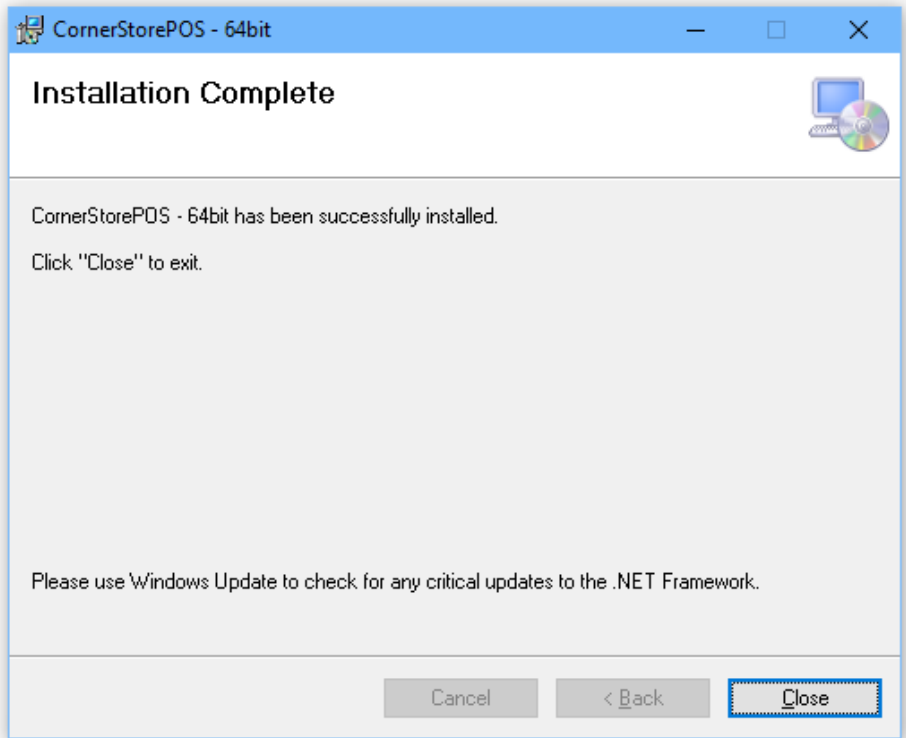

6. Click Next

7. Let it install

8. Click Close

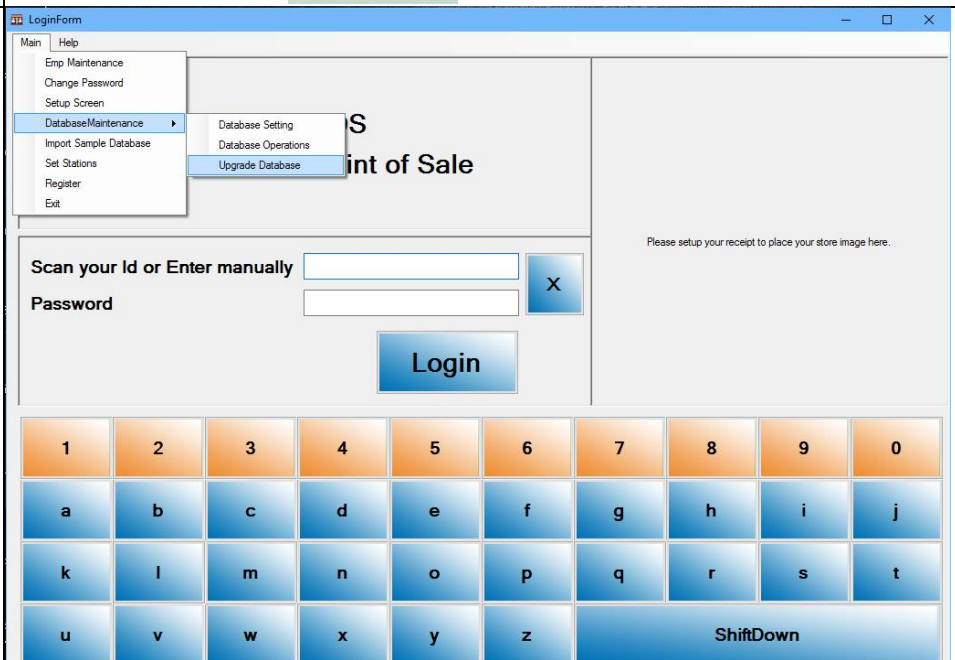

New version of CornerStorePOS is now installed on your computer

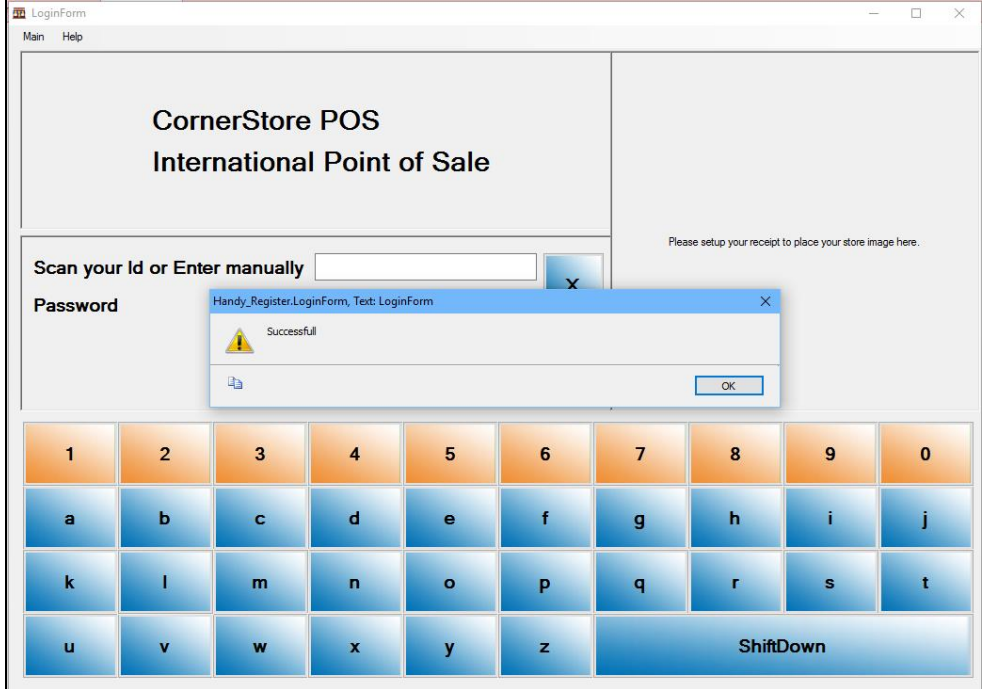

9. Double click the CornerStorePOS icon to open it

10. On CornerStorePOS Goto Main-> DatabaseMaintenance and click Upgrade Database

11. Click OK

Now you have successfully upgraded CornerStorePOS and you can login with your old username and password.
