

INTERNATIONAL POINT OF SALE

CornerStore POS Upgrade

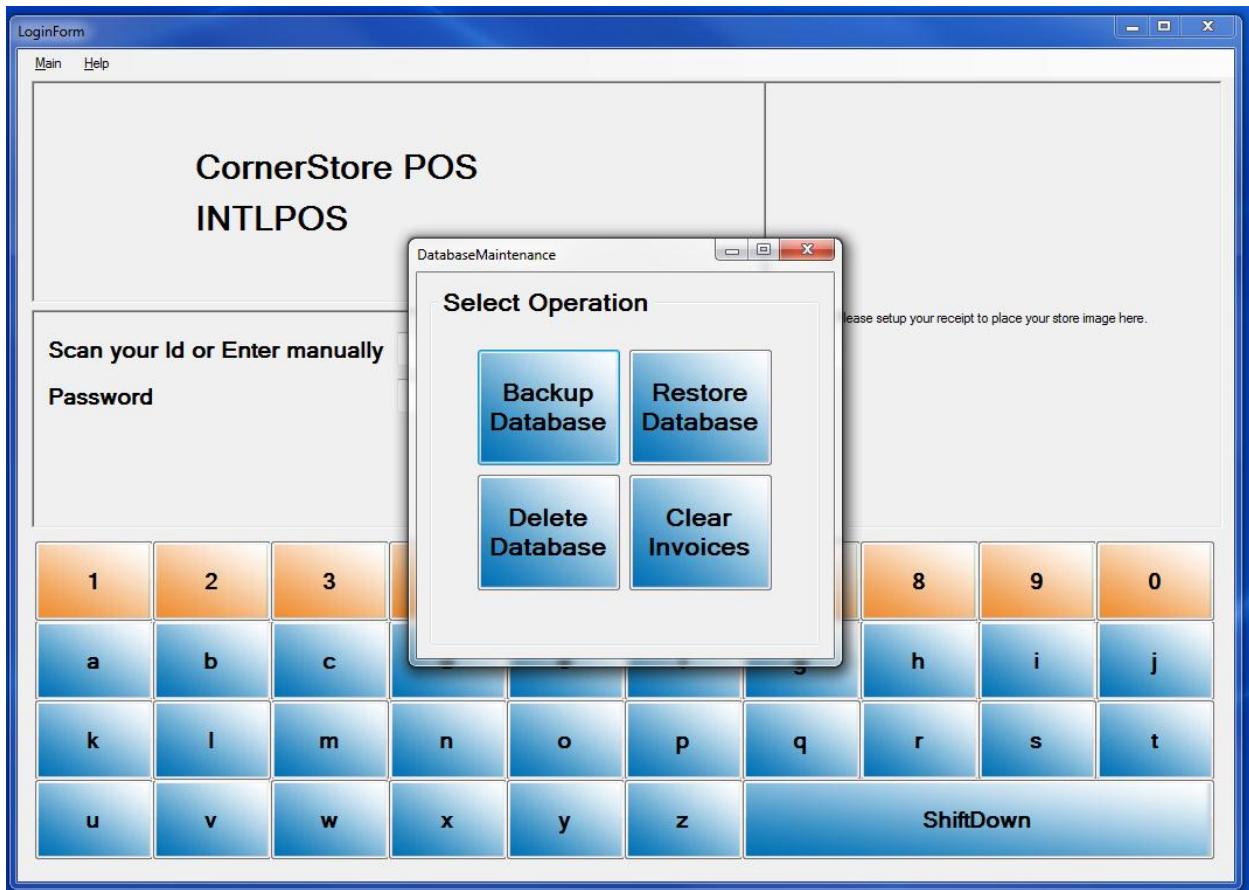

International Point of Sale has developed a **NEW** and **IMPROVED** version of CornerStore POS with more features that will assist business owners local and nationwide alike to keep their business profitable.

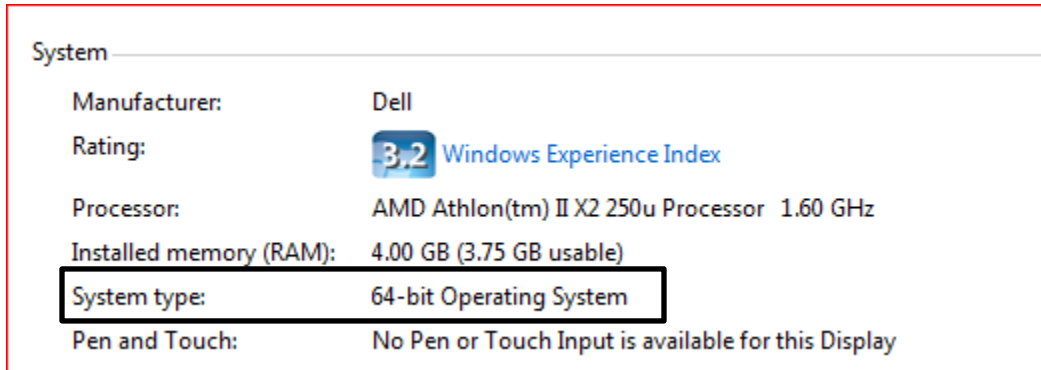

NOTE: In order to complete this upgrade you will need to **re-register the CornerStore software** and only **Technical Support** can do this for you.

Please follow these steps for CornerStore upgrade:

Step 1: Before you begin it is important you first back up your CornerStore database. In order to do this, go to CornerStore login screen. In the top left hand corner click on MAIN and select Database Operations -> Back Up Database

Step 2: To download the proper setup file (32B or 64B) for CornerStore POS you will need to check your system type. Go to **Windows Start >> Right Click on Computer (or My Computer) >> Select Properties**

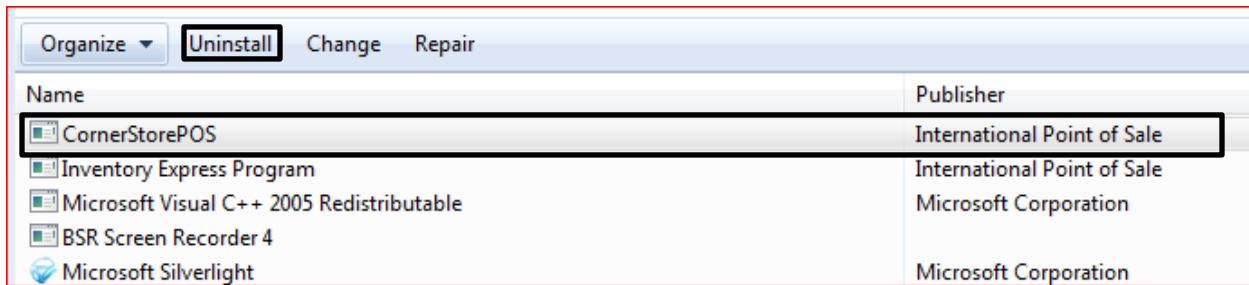

Step 3: Now you can choose the correct file for your system type you can download,

32 bit: <http://www.internationalpointofsale.com/CornerStore.msi>

64 bit: http://www.internationalpointofsale.com/CornerStore_x64.msi

Step 3: Uninstall your old copy of CornerStore. In order to do this, go to **Windows Start >> Control Panel >> Add/Remove Programs** and highlight cornerstore and select **Uninstall** from the top.

Step 4: Double click downloaded CornerStore file and follow the prompts.

Step 5: After installing the newer version you need to do two more steps:

- Open CornerStore and on the login screen go to **MAIN >>Database Maintenance>> Upgrade Database**. You will receive message **“Successfully Upgraded”**.
- If you have a very old version of CornerStore then it will requires doing re-registration.
