

## Programming Your Motorola DS9208 Omni Directional Barcode Scanner

This document will show you how to program your Motorola DS9208 Omni Directional Barcode Scanner to read barcodes the way they are formatted in your Corner Store POS database.

Most of your products have UPC-A barcodes that have 12 digits with 10 digits in the middle, one in the front and one at the end. Here's an example:

Other products have UPC-E barcodes that have 8 digits with 6 in the middle, one in the front (usually a zero) and one at the end. Here's an example:

All of these codes and more are found in the Motorola DS9208 Omni Directional Barcode Scanner user manual found here:

Reset to factory defaults (usually not necessary)

Carriage Return (simulates Enter key) - Use this if when you scan a barcode, you have to press enter to get the item # onto the invoice grid

**UPC-A**

Transmit the first digit

Remove the first digit

Transmit the last digit

Remove the last digit

**UPC-E**

Transmit the first digit

Remove the first digit

Transmit the last digit

Remove the last digit
